OVERVIEW

DAX IMMO™ is a business empowering system for Real-Estate market oriented companies that provides flexibility, responsiveness and mobility. Various insight to data is also provided, all in order to reduce time needed to reach potential targets and goals. DAX IMMO™ adapts to the needs of the users, and to the changing business climate to offer best support for Real-Estate trading companies and Property Management companies with big market expansion, providing services to a limitless number of clients. DAX IMMO™ also adapts to the market regulations and covers all processes dependent on the country that the business is located, and also offers multi-country coverage. Using DAX IMMO™ provides overview in the efficiency and tracks the company progress in order to ever improve and tackle the global market.

SUPPORT

DAX IMMO™ is developed by the EVER-NEAR team. All round experience with a big span of ICT knowledge and technologies, as well as real estate market oriented background, covering all the possible fields in which the market could and would expand, to meet every specific need that the client expects from their software solution. Working toward providing the client with a complete tailored solution.

DAX IMMO™ VALUE PROPOSITION

With an ever improving solution with a continuously growing set of features, the value proposition is a lasting solution to promise a head start to real estate and property management companies against the competition.

Flexible solution tailored to you needs

Conceived as the answer to the ever-changing market, flexibility to adapt to the new demands is and will be of essence to the product value.

End-to-end solution

DAX IMMO™ is an all-round, end-to-end solution covering all the business aspects.

Modularity

Being created by a single company, all the modules in the DAX IMMO™ work together as a whole. To achieve maximum potential all parts of the solution function as one. The Microsoft Dynamics AX DAX IMMO™ vertical as a column, and the DAX IMMO™ external application coupled with the web

site and portal on one side, and cross-platform mobile applications for your employees and customers on the other, create an unmatched network of coverage.

Designed for configurability

Instead of endless customization of the code and development tweaks, the software is designed to be easily configured by the user. Using a system of blueprints for the local markets and roles, DAX IMMO™ can be set up to meet regulations and allows rapid deployment to new services on the market.

Top of the chain

DAX IMMO™ strives to be on top of the chain by using cutting edge technologies and by having a broad market insight. Following newest technology trends is and will be a practice, and implementing the best of them with a smooth transition is guaranteed. The whole point of this being the satisfaction of the customer.

Improved service for a lower cost

DAX IMMO™ combines efficiency with customer service by streamlining business processes.

User friendly, familiar at home feeling

With user interface that is easy to use and consistent with Microsoft users, the training for new users is drastically reduced. The external and mobile applications as well as the website and portal are intuitive and pleasure work with.

Efficiency

DAX IMMO™ is optimized for minimum human interaction. Customer interactions are integrated, in a form of emails, reminders, etc.

Business insight

Role center that provides scalability in data insight and an intuitive way to interact with DAX IMMO™. This provides meaningful data and analytics to everyone in the company.

MICROSOFT POWERED

DAX IMMO™ is powered by Microsoft Dynamics AX, and is the best Real Estate market oriented AX solution on the globe. DAX IMMO™ is developed according to Microsoft's highest standards and follows Microsoft's latest trends.

INNOVATIVE

DAX IMMO™ offers unique chance to bring new energy to your company, by empowering it with a whole new innovative solution, specially developed to provide maximum support in every field of the business. Having the first complete solution of its kind is a big step forward to outsmarting the competition.

TAKE YOUR BUSINESS TO THE CLOUD

Following worldwide trends the Microsoft Dynamics AX is hosted on the cloud using Azure. Similarly all the products that make up DAX IMMO™ are cloud hosted. That way the resources needed for this solution are reduced as well as the costs.
